AIR CONDITIONING CONCEPT

Air conditioning is cooling/Heating, Dehumidifying and maintaining air purity in the conditioned space.

The system has to be designed based on the application and the comfort need with no over sizing and under sizing to ensure adequate power consumption. This also ensures highest SEER seasonal energy efficiency ratio the another important aspect is to ensure proper installation along with guideline and specification. The rating of material such as steel, electrical, mechanical should be as per the ISHRAE Guideline. Proper Air distribution is key to best air-conditioning system which ensures uniform cooling/heating all across the area along with the required fresh air & ventilation system.
